State of Oklahoma
Public Water Supply Program
Annual Compliance Report
for Calendar Year 2023

The Drinking Water Program: An Overview

The Environmental Protection Agency (EPA) established the Public Water System Supervision (PWSS) Program under the authority of the 1974 Safe Drinking Water Act (SDWA). Under SDWA and the 1986 Amendments, EPA sets national limits on contaminant levels in drinking water to ensure that the water is safe for human consumption. These limits are known as Maximum Contaminant Levels (MCLs) and Maximum Residual Disinfectant Levels (MRDLs). For some regulations, EPA establishes treatment techniques (TTs) in lieu of an MCL to control unacceptable levels of contaminants in water. EPA also regulates how often public water supply systems (PWSs) monitor their water for contaminants and report the monitoring results to the states or EPA. Generally, the larger the population served by a water system, the more frequent the monitoring and reporting (M/R) requirements are. In addition, EPA requires PWSs to monitor for unregulated contaminants to provide data for future regulatory development. Finally, EPA requires PWSs to notify their consumers when they have violated these regulations. The 1996 Amendments to the SDWA require consumer notification to include a clear and understandable explanation of the nature of the violation, its potential adverse health effects, steps that the PWS is undertaking to correct the violation, and the possibility of alternative water supplies for use during the violation.

The SDWA applies to the 50 states, the District of Columbia, Indian Lands, Puerto Rico, the Virgin Islands, American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the Republic of Palau.

The SDWA allows states and territories to seek EPA approval to administer their own PWSS Programs. The authority to run a PWSS Program is called primacy. For a state to receive primacy, EPA must determine that the state meets certain requirements laid out in the SDWA and the regulations, including the adoption of drinking water regulations that are at least as stringent as the Federal regulations and a demonstration that they can enforce the program requirements. Of the 56 states and territories, all but Wyoming and the District of Columbia have primacy. The EPA Regional Offices administer the PWSS Programs within these two jurisdictions. The Oklahoma Department of Environmental Quality (DEQ) is the primacy agency for the State of Oklahoma Drinking Water Program.

The 1986 SDWA Amendments gave Indian Tribes the right to apply for and receive primacy. EPA currently administers PWSS Programs on all Indian lands except the Navajo nation, which was granted primacy in late 2000.

Annual State PWS Report

Each quarter, primacy states submit data to the EPA Safe Drinking Water Information System (SDWIS/FED), an automated database maintained by EPA. The data submitted include, but are not limited to, PWS inventory information, the incidence of Maximum Contaminant Level, Maximum Residual Disinfectant Level, monitoring and treatment technique violations; and information on enforcement activity related to these violations. Section 1414(c) (3) of the Safe Drinking Water Act requires states to provide EPA with an annual report of the violations in each of six categories: MCLs, MRDLs, treatment techniques, variances and exemptions, significant monitoring violations, and significant consumer notification violations. Violation and enforcement action data are stored in the SDWIS/FED database. The tables in this report are based largely on data retrieved from DEQ databases.

Maximum Contaminant Level

Under SDWA, EPA sets national limits on contaminant levels in drinking water to ensure that the water is safe for human consumption. These limits are known as Maximum Contaminant Levels (MCLs).

Maximum Residual Disinfectant Levels

The EPA sets national limits on residual disinfectant levels in drinking water to reduce the risk of exposure to disinfectant byproducts formed when PWSs add chemical disinfectant for either primary or residual treatment. These are known as Maximum Residual Disinfectant Levels (MRDLs).

Treatment Techniques

For some regulations, the EPA establishes treatment techniques (TTs) in lieu of an MCL to control unacceptable levels of certain contaminants. For example, TTs have been established for viruses, some bacteria, total organic carbon and turbidity.

Variations and Exemptions

A primacy state can grant a PWS a variance from a primary drinking water regulation if the characteristics of the raw water sources reasonably available to the PWS do not allow the system to meet the MCL. To obtain a variance, the system must agree to install the best available technology, treatment techniques, or other means of limiting drinking water contamination that the Administrator finds are available (taking costs into account), and the state must find that the variance will not result in an unreasonable risk to public health. At the time the variance is granted, the state must prescribe a schedule (including increments of progress) the PWS will follow to come into eventual compliance with the MCL. Small systems (those serving 3,300 or fewer persons; or 10,000 or fewer persons with the Administrator's approval) may also be granted variances if they cannot afford (as determined by application of the Administrator's affordability criteria) to comply with certain MCLs (non-microbial, promulgated after January 1, 1986) by means of treatment, alternative source of water, or restructuring or consolidation. Small systems will be allowed three (3) years to install and operate EPA approved small system variance technology. The variance shall be reviewed not less than every five (5) years to determine if the system remains eligible for the variance.

A primacy state can grant an exemption temporarily relieving a PWS of its obligation to comply with an MCL, treatment technique, or both if the system's noncompliance results from compelling factors (which may include economic factors) and the system was in operation on the effective date of the MCL or treatment technique requirement. A new PWS that was not in operation on the effective date of the MCL or treatment technique requirement by that date may be granted an exemption only if no reasonable alternative source of drinking water is available to the new system. Neither an old or a new PWS is eligible for an exemption if management or restructuring changes can reasonably be made that will result in compliance with the SDWA or improvement of water quality, or if the exemption will result in an unreasonable risk to public health. The state will require the PWS to comply with the MCL or treatment technique as expeditiously as practicable, but not later than 3 years after the otherwise applicable compliance date.

While DEQ routinely provides variances to PWS from state construction and operations requirements when the PWS can successfully document that the variance will be at least as protective of public health as the regulation, DEQ has never granted a variance to a PWS for meeting an MCL or treatment technique under this provision of the SDWA.

Monitoring

A PWS is required to monitor and verify that the levels of contaminants present in the water do not exceed the MCL. If a PWS fails to have its water tested as required or fails to report test results correctly to the primacy agent, a monitoring violation occurs.

Significant Monitoring Violations

For this report, significant monitoring violations are generally defined as any major monitoring violation that occurred during the calendar year of the report. A major monitoring violation, with rare exceptions, occurs when no samples were taken, or no results were reported during a compliance period.

Consumer Notification

Every Community Water System is required to deliver to its customers a brief annual water quality report. This report is to include some educational material, and will provide information on the source water, the levels of any detected contaminants, and compliance with drinking water regulations.

Significant Consumer Notification Violations

For this report, a significant public notification violation occurred if a community water system completely failed to provide its customers the required annual water quality report.

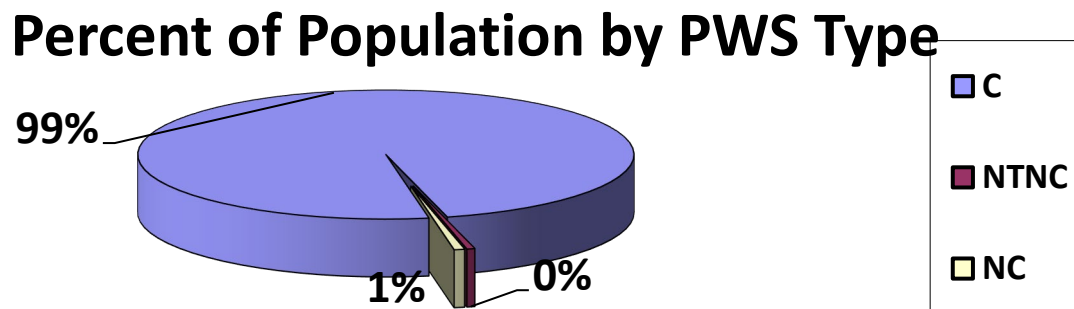

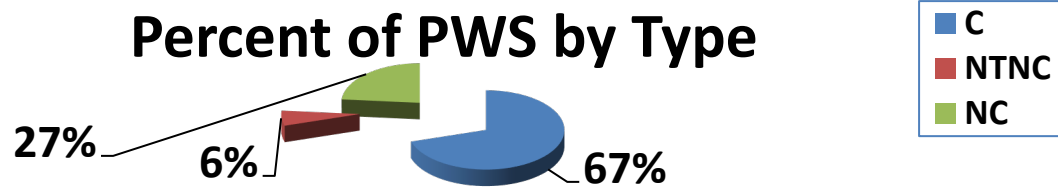

Public Water Supply Inventory – Calendar Year 2023

The SDWA defines a Public Water Supply system (PWS) as a system that provides water via piping or other constructed conveyances for human consumption to at least 15 service connections or serves an average of at least 25 people for at least 60 days each year. There are three types of PWSs. PWSs can be community (such as towns and rural water districts), non-transient non-community (such as schools or factories), or transient non-community systems (such as rest stops or parks). For this report, the acronym “PWS” means systems of all types unless specified in greater detail.

The Oklahoma Department of Environmental Quality also recognizes smaller systems as public water supplies. These public water supplies are referred to as minor or non-public water systems. Violations and enforcement actions for minor public water supply systems are not reported to SDWIS and are not included in this report.

The number of Community, Non-Transient Non-Community, and Non-Community water systems and the population served by each is given in the following table. The average number of individuals that consume water from each system each day is used to calculate the number of residents served by a public water supply. Because some systems are restaurants, tourist attractions, etc., individuals may be counted more than once due to where they patronize or work. Out-of-state individuals that visit or do business in the state are also counted.

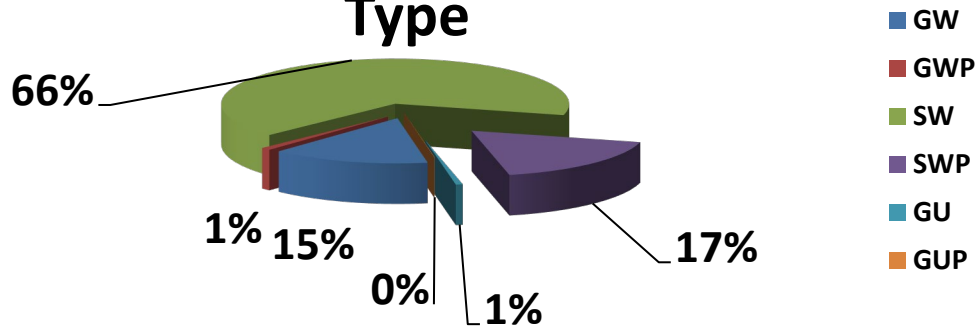

Table A: Public Water Supply Systems by Type	Number of Systems	Population
Community Systems (C)	890	3,728,145
Non-Transient Non-Community Systems (NTNC)	78	19,718
Non-Community Systems (NC)	299	25,770
Total PWS systems meeting Federal Definition	1,267	3,773,633

Public water supply systems may receive their water from groundwater wells, surface water impoundments or reservoirs, or purchase water from other systems for their primary source of drinking water or for supplemental supply. The number of groundwater, surface water, and purchase systems and the population served by each type is given in the table below. Eighty-four percent (84%) of the population is served by surface water or purchased from surface water systems.

Table B: Public Water Supply Systems by Source	Number of Systems	Population
Public Water Supplies using Surface Water as their Primary Source (SW)	178	2,498,406
Public Water Supplies using Groundwater as their Primary Source (GW)	705	554,754
Public Water Supplies using Groundwater under the Influence of Surface Water as their Primary Source (GU)	8	24,642
Public Water Supplies purchasing from Surface Water systems (SWP)	301	659,401
Public Water Supplies purchasing from Groundwater systems (GWP)	71	34,883
Public Water Supplies purchasing from Groundwater under the Influence of Surface Water systems (GUP)	4	1,547
	1,267	3,773,633

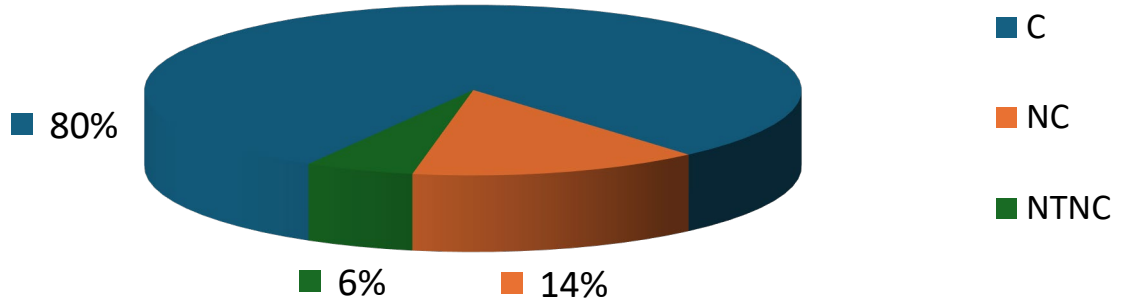

Percentage of Population by Source Type

There are two thousand five hundred and fifty (2,550) water wells currently being operated by PWSs in the state of Oklahoma. The number of wells operated by community, non-transient non-community, and non-community water systems are given in the table below.

Table C: Number of Wells operated by Public Water Supply Systems	
Community system's wells	2,048
Non-Transient Non-Community system's (NTNC) wells	137
Non-Community system's (NC) wells	365
Total Number of PWS wells	2,550

Percent of Wells by PWS Type

Public Water Supply Violations and Enforcement – Calendar year 2023

The number of MCL/MRDL violations, treatment technique violations, and monitoring violations for each contaminant regulated for the compliance interval January 1, 2023, to December 31, 2023, is given in the following table.

Chemical Contaminant	MCLs		Treatment Technique		Significant Monitoring/Reporting	
	Number of Violations	Number of Systems with Violations	Number of Violations	Number of Systems with Violations	Number of Violations	Number of Systems with Violations
Phase II/V						
Arsenic MCL Violations	14	5				
Arsenic Monitoring Violations					8	5
IOC MCL Violations	14	5				
IOC Monitoring Violations					46	10
Nitrate & Nitrite as (N) MCL	47	21				
Nitrate Monitoring Violations					123	87
SOC MCL Violations	0	0				
SOC Monitoring Violations					2160	65
VOC MCL Violations	0	0				
VOC Monitoring Violations					1062	29
Radionuclide						
MCL Violations	12	5				
Monitoring Violations					180	19
DBPR Rule						
DBP MCL & MRDL	695	156				
Treatment Technique (TOC's)			68	24		
Monitoring Violations					596	218
Total Coliform Rule (RTCR)						
Acute MCL Violations	2	2				
TCR Monitoring Violations					615	287
Lead & Copper Rule						
Treatment Technique			0	0		
Monitoring Violations					64	53
Ground Water Rule						
Treatment Technique			0	0		
Monitoring Violations					39	32
Surface Water Rules						
Treatment Technique			72	16		
Monitoring Violations					90	26
Consumer Confidence Report						
Failure to distribute or submit					76	76
Public Notification						
Failure to notify					155	13
<i>SUBTOTALS</i>	784	194	140	40	5,214	920
GRAND TOTAL OF VIOLATIONS = 6,138						
ACTUAL TOTAL NUMBER OF PUBLIC WATER SYSTEMS WITH MCL VIOLATIONS = 200						
ACTUAL TOTAL COUNT OF PUBLIC WATER SYSTEMS IN VIOLATION FOR MCL, TREATMENT TECHNIQUE AND MONITORING/REPORTING ACROSS ALL RULES = 521						

Comments and Remarks

The State of Oklahoma's Public Water Supply Program currently oversees one thousand two hundred sixty-seven (1,267) public water supplies (PWS) that meet the federal definition of a PWS. The grand total number of violations for the calendar year of 2023 was six thousand one hundred thirty-eight (6,138). Some public water systems may be counted more than once if they incurred multiple violations. The actual total number of public water systems in violation for MCL was two hundred (200). Of one thousand two hundred sixty-seven (1,267) systems, one thousand seventy-three (1,073) or eighty-five percent (85%) of these systems reported no maximum contaminant level (MCL) violations. Five hundred twenty-one (521) systems or forty-one percent (41%) of the one thousand two hundred sixty-seven (1,267) PWSs incurred a violation at some point during the calendar year of 2023.

Five (5) systems had fourteen (14) violations for exceeding the MCL for arsenic. Five (5) systems had violations for arsenic monitoring. Five (5) systems had fourteen (14) violations for exceeding the MCL of the Inorganic Chemical Contaminant (IOC) group. Ten (10) systems had forty-six (46) violations for IOC group monitoring. Twenty-one (21) systems had forty-seven (47) violations for exceeding the nitrate MCL standard in at least one of their wells during the calendar year of 2023. Eighty-seven (87) systems had one hundred twenty-three (123) nitrate monitoring violations. No systems had Synthetic Organic Contaminant (SOC) group MCL violations. Sixty-Five (65) systems had two thousand one hundred sixty (2,160) SOC monitoring contaminant violations. No systems had Volatile Organic Chemical Contaminant (VOC) group MCL violations. Twenty-nine (29) systems had one thousand sixty-two (1,062) VOC contaminant monitoring violations.

Five (5) systems had twelve (12) Radionuclide MCL violations in the calendar year 2023. Nineteen (19) systems had one hundred eighty (180) violations for Radionuclide monitoring. One hundred fifty-six (156) systems had six hundred ninety-five (695) violations of the Disinfection Byproducts Rule (DBPR) MCL. Twenty-four (24) systems had sixty-eight (68) violations of the DBPR Treatment Technique requirement. Two hundred eighteen (218) systems had five hundred ninety-six (596) monitoring violations for the DBPR.

Three (3) systems had three (3) Revised Total Coliform Rule (RTCR) acute MCL violations, meaning two (2) mandatory Boil Orders were issued for these PWS that tested positive for E-coli. Two hundred eighty-seven (287) systems had six hundred fifteen (615) monitoring violations for the RTCR. Zero (0) systems had a treatment technique violation for the Lead and Copper Rule. Fifty-three (53) systems had sixty-four (64) monitoring violations for the Lead and Copper Rule. No systems had any Ground Water Rule (GWR) Treatment Technique violations. Thirty-two (32) systems had thirty-nine (39) monitoring violations for the GWR.

All surface water PWSs in Oklahoma are required to provide filtration. Sixteen (16) systems had seventy-two (72) Surface Water Rule (SWR) treatment technique violations. Twenty-six (26) systems had ninety (90) SWTR monitoring violations. There were seventy-six (76) systems with seventy-six (76) violations for failure to submit a consumer confidence report (CCR). Thirteen (13) systems had one hundred fifty-five (155) violations for failure to do Public Notification (PN).

<u>Type of Enforcement Actions</u>	<u>Number of Enforcement Actions Issued</u>
Informal Enforcement Letters	2,751
Notices of Violation/Consent Orders	461
Administrative Compliance Orders	8
Boil Orders	3
<u>Total Number of Enforcement Actions</u>	<u>3,223</u>
Return to Compliance	2,141

The Oklahoma Department of Environmental Quality issued three thousand two hundred twenty-three (3,223) enforcement actions in response to the violations listed in this report. These enforcement actions consisted of two thousand seven hundred fifty-one (2,751) informal enforcement letters. Four hundred sixty-one (461) Notices of Violation (NOVs)/Consent Orders (COs), eight (8) Administrative Compliance Orders (ACO), and three (3) Boil Orders were administered. Two thousand one hundred forty-one (2,141) systems were returned to compliance during the calendar year of 2023.

An informal enforcement letter is the first document issued to facilities when they fail to monitor. A Notice of Violation is the first formal enforcement document issued to facilities when they exceed maximum allowable levels or fail to meet DEQ rules and regulations concerning matters such as construction deficiencies or operating procedures. A Consent Order is typically the next order issued. The Consent Order is an order that contains an agreement between the water system and DEQ and details the tasks and deadlines for correcting the cited violation. An Administrative Compliance Order is an order that is issued when time is limited, and there is a significant health hazard, or the water system refuses to agree to the Consent Order. Both the Consent Order and the Administrative Compliance Order have stipulated penalties for failing to meet the required deadlines. Boil Orders are issued to systems that have “acute” or “E. coli” bacteriological violations. Boil Orders can also be issued for exceedance of turbidity standards, insufficient chlorine residuals, and low pressure. Boil Orders require immediate notice to all consumers in order inform the public of how to make their water safe for human consumption.
